## SUMMARY

I am a student close to finishing his academic career at the University of Waterloo. My past work experience has taught me more than just technical knowledge: it has also taught me that I feel empowered by additional responsibility - rather than feeling overwhelmed, that I crave autonomy, and that I consistently meet or exceed my employers' expectations.

## SKILLS

- Six years of programming experience in C++, Java and others
- Superb mobile application development skills
- Excellent communication and interpersonal skills

## EDUCATION

### **University of Waterloo**

September 2011 – August 2016 | Waterloo, Ontario  
Honours Computer Science and Joint Honours Music

## EXPERIENCE

### **SHIELD Software Developer, NVIDIA Corporation**

Winter 2014 | Austin, Texas

I created applications for a variety of Android based devices, including the NVIDIA SHIELD, and fixed defects in the existing Android framework.

### **Application Patterns and Extensions Developer, BlackBerry**

Spring 2013 | Waterloo, Ontario

I worked with a great team on a variety of projects. My contribution consisted of automated test code and changes to a number of user interface components.

### **Mobile Application Developer, Self-employed**

August 2012 – present | Waterloo, Ontario

I designed, developed, and published mobile applications in the BlackBerry App World as well as the Google Play Store. As well, I provided excellent customer support to all purchasers and incorporated their suggested features into my applications.
